

ELEC 4700 Git and Github

Tom Smy

January 14, 2022. Due January 16 @ midnight.

Goal In this PA you should familiarize with yourself Git and Github.

Tasks

1. Get at Github account (free)
2. Have a look at the tutorials on github and the help
3. If you need to install git on the computer you wish to use.
4. Fork the 4700 code repo
5. Clone your fork on your local computer
 - (a) Inspect the code (you can even try running some of it)
6. Create a new repo on github
 - (a) Clone it
 - (b) Add a file or two
 - (c) Make a commit
 - (d) Push it back to github
 - (e) Goto github logon and see that the push was done.
